Dear Parents

Another quarter has passed us by. We often don't see the results of our efforts because they are long term not short term. It is only when we reflect upon the progress made over a longer period of time do we appreciate how far each of the students has progressed academically, socially and in their demeanor and maturity. As parents who do not get to see your children as often as we do the changes must seem a lot greater. We appreciate the privilege of being able to help nurture your children and help you to raise productive, thoughtful citizens of tomorrow. Thank you.
