September 22

- Teacher's PD Day (No School for Students)

September 30

- CMAC - Junior Swim Meet @ NIS

PRINCIPAL'S MESSAGE

Happy Friday! We have had another successful week here at APIS with lots of positive things to report!

First and foremost, I would like to welcome Ms. Nandini Basu, our new Diploma Programme Coordinator! Ms. Nan arrived in Chiang Mai last Sunday and immediately started working with our Diploma Programme students. Due to our MAP testing (more on that below), she was able to spend significant time with our Grade 12 students this week, ensuring they are making proper progress in their classes. Welcome, Ms. Nan - you are an amazing addition to our team here at APIS!

In athletics, we had our first games this week against Lanna International School. Our boys and girls football and boys basketball teams all competed on Tuesday afternoon. Although the results were not what we had hoped for, our kids gained valuable experience, and the coaches are proud of their effort and spirit. GO DRAGONS!

Next week is another big week for us as we host our first Chiang Mai Athletic Conference (CMAC) event on Wednesday - the "Junior Warm-up Swim Meet". The event will start at 2:00 pm on Wednesday, September 10, and will be hosted in our beautiful pool. All parents are invited to come watch. The Student Council will have various treats and beverages on sale. We look forward to seeing you there!

Finally, I know some of you are wondering about the Parent Support Group (PSG) at Main Campus. We have some very exciting things planned for the PSG this year, but we are holding off on our first meeting until our last remaining staff members arrive on campus, which should be soon, so stay tuned!

Thank you all and have a lovely weekend.

Jordan Scheer
MC Principal

STUDENT INFORMATION PACKET

As part of our annual process, we kindly request your assistance in ensuring that our student records remain accurate and up-to-date. The Student Information Packet for the 2025-2026 school year has been sent home with your child today.

The packet includes the following documents:

- Student Information Update Form
- Student Consent Form (PDPA)
- Handbook Acknowledgement Form
- Responsible Use Agreement Form

Please complete the required forms and return them to your child's homeroom teacher or advisors by Friday, September 12, 2025.

MAP TESTING

This week, we conducted our annual Fall MAP Testing in Reading, Language Usage, and Mathematics. All students from Grade 5 to Grade 11 took the tests, and we should receive the data by next week. **If your child was absent any day this week, they will make up the tests next week during After School Activities.** The data we get from this test helps us to plan for the year ahead by giving us insight into where our students are right now and what they are ready to learn next. We will explain more about MAP at our first PSG meeting, which will be happening soon!

BABY PODCAST EP 2

Welcome to Episode 2 of the APIS Baby Podcast! In this episode, we travel across the wonders of our world and beyond. From the mantis shrimp's lightning-fast punch to the thorn bug's clever disguise, we explore the hidden powers of nature. We dive back in time to meet ancient sea reptiles, discover how fashion became art, and learn how social media connects us today. Finally, we look up to the sky to celebrate the Sun, our life-giving star. It's a journey full of discovery—through nature, history, and the universe!

Thanks to everyone for listening! Stay curious, keep learning, and join us next week for more adventures!
