- 30 - Res. Outing: Night Safari 5 K

Dear Parents and Students

The three components of the Residential Life program are; **academic support** which we do through study hall and working with the teachers. We see the same as you do on Toddle so we are able to monitor each students progress, follow up on overdue assignments and help in areas where they are not so strong. We teach **life skills** both on and off campus. This can range from how to correctly use a knife and fork through to basic first aid. Many of the workshops we attend are to teach life skills. **Service learning** is helping others both at school and in the community. This helps develop a sense of empathy for others rather than only concerning themselves with themselves. So when considering what your child gets by being in the residential life program, it is far from a bed and 3 meals a day.
